## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's amendment filed 3/16/2009 has been entered. Claims 1, 8, and 13 are amended. Claim 2 is cancelled. Claims 1 and 3-16 are pending.

### ***Response to Arguments***

Applicant's arguments, with respect to amended claims 1 and 3-16, filed 3/16/2009, have been fully considered and are persuasive.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1 and 3-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The newly added limitation, "the ID communication partner device being always activated to the same mode selected from a Reader Talks First mode and a Tag Talks First mode when the recognition result signal indicates the absence of the mode activation signal, the ID communication partner device being always activated to the other mode of the RTF mode and the TTF mode when the recognition result signal indicates the presence of the mode activation signal" is not clearly supported by the

Art Unit: 2612

specification. Applicant states support for the newly added limitations in the independent claims are present beginning at line 26 on page 9 of the specification. The examiner did not find definite evidence of support in the specification in the pages mentioned. A more clear explanation and a more exact page reference in the specification are required.
